Reference: This is a Citizen's Request within Foreign Policy; Covid-19 and Biological/Biochemical Warhead Storage Disarmament Diplomacy. This is a SchoolProjectPeaceMission.com commentary.

Commentary: "Why does planet Saturn not have an Earth like planet nor a Mars like planet inside its beautifully colored outer rings?"

To the People of the United States of America:

Ladies and Gentlemen! The following is an opinion, my opinion, and a world opinion, on one approach to solving our United States of America's and World's quest to "Overcome Eternal War" through continued Bio-Chemical and Bio-logical Weapons Disarmament. The first Biochemical Weapons Convention of the now United Nations has grown ever since being signed in Geneva in 1925.

That original effort was formerly known as; "The Convention on the Prohibition of the Development, Production, and Stockpiling of {Biological} and Toxin Weapons, and on their Destruction".

Closing Prayer: Lord Jesus Christ, we pray that you heal the political divide that has surfaced during the Covid-19 Pandemic of 2020/2021. Help us administer the cure here in our USA and all around the world. Help our world of many nations, many religions, and many governments overcome "Eternal War". Help us love our neighbors. Help us study and help us learn. Teamwork is Leadership. Help us study, learn, and work together. Help us understand that every day, week, month, year, decade, century, and through millenniums we will form a more perfect union. Amen!

May the Force be with you!

May the Force be with all of us as we overcome Covid-19 as one!

May the Force be with all of us as we overcome "Eternal War"!

Respectfully yours in Christ @ Sea & @ Home!
